

Product Overview

Labeling

We are the only manufacturer worldwide to offer all labeling technologies as well as the "Label on Demand" service. Our labels can be used in a variety of ways: For single wires, cables, switchgear, terminals, type plates, push buttons, conduits as well as control and signal devices.

Conduits & fittings

Our high-quality product range includes various standard and special developments. The benefits for the user and the system concept are always in the focus: Both regarding our compatible cable protection conduits, fittings and connectors as well as for our holder systems and accessories.

Cable entry systems & holders

murrplastik® produces and distributes cable entry systems and plates, strain relief and EMC solutions. With "KDP on Demand", we are the only company in the world to offer cable entry systems that are completely customized: in size, shape, material and hole pattern.

Automation & Robotics

We offer individual products, complete solutions, service and support "everything from one source". Our strength: Customized solutions. We customize our fastening elements, retraction systems, dresspacks and accessories to meet your individual requirements.

Energy chains

murrplastik® offers energy chains, cables, plugs, connectors, strain reliefs, guide channels as well as assembly, consulting and service - "everything from one source". Our system solutions are innovative, application-specific and 100% coordinated.

Solutions

Due to the possibility of customized solutions, individual adaptations and modifications of the murrplastik® range, we can respond to the specific requirements of our customers and offer solutions that are perfectly tailored to their needs.
