

MicroGrippers

Another Chip Quik® Solution for the Electronic Workbench

The Test Access Solution

When connecting test equipment such as emulators, logic analyzers, or oscilloscopes to individual QFP leads, the MicroGripper makes it quick and easy. No more time-consuming soldering to leads or buying test clips that may never be used again. The MicroGripper is uniquely designed to provide hands-free testing of one or can be stacked for multiple pin testing.
